Managing Microsoft Systems Management Server 2003

Microsoft

Support de cours : Certification : Nous consulter

This five-day instructor-led course provides students with the knowledge and skills to manage Microsoft® Systems Management Server (SMS). Students will learn how to configure SMS components and how to manage the ongoing operations of an SMS infrastructure.

PRE-REQUIS

Before attending this course, students must have :

- ④ Completed Course 2272, Implementing and Supporting Microsoft Windows XP Professional, or equivalent knowledge
- ④ Completed Course 2277, Implementing, Managing, and Maintaining a Microsoft Windows Server™ 2003 Network Infrastructure: Network Services, or equivalent knowledge
- ④ System administrator-level working knowledge of :
- ④ Deployment, configuration, and troubleshooting for Windows-based personal computers
- ④ TCP/IP networking
- ④ SQL Server
- ④ Active Directory® directory service.

PARTICIPANTS

This course is intended for SMS Administrators who are responsible for configuring and managing one or more SMS sites and all supporting systems. They have one to three years of experience supporting multiple desktop and server computers running Microsoft Windows® 2000 or Windows 2003 in medium to large enterprise organizations.

CONTENU DU COURS

- Module 1** : Overview of Systems Management Server 2003
- Module 2** : Exploring SMS Site Architecture
- Module 3** : Preparing to Deploy the SMS Clients
- Module 4** : Deploying SMS Clients
- Module 5** : Collecting Inventory and Software Metering
- Module 6** : Querying and Reporting Data
- Module 7** : Preparing an SMS Site for Software Distribution
- Module 8** : Managing Software Distribution
- Module 9** : Implementing SMS Software Update Tools and Managing Update Deployment
- Module 10** : Using Remote Tools for Client Support
- Module 11** : Working with SMS Hierarchies
- Module 12** : Performing Site Maintenance, Backup, and Recovery Tasks

Planning and Deploying Microsoft Systems Management Server 2003

Microsoft

Support de cours : Certification : Nous consulter

After completing this course, students will be able to : Analyze business requirements for SMS, Create and evaluate an SMS deployment plan, Plan an SMS site hierarchy, Install the Site hierarchy, Configure a site system, Discover SMS resources, Install SMS clients, Configure SMS site hierarchies, Secure an SMS site, Create a management and operations plan,

PRE-REQUIS

Before attending this course, students must have : Completed Course 2596, Managing Microsoft Systems Management Server 2003, or have equivalent knowledge, Completed Course 2279, Planning, Implementing, and Maintaining a Microsoft Windows Server™ 2003 Active Directory® Infrastructure, or have equivalent knowledge, System engineers should also have strong working knowledge of (IP addressing. This is covered in Course 2151, Microsoft Windows 2000 Network and Operating System Essentials , Windows 2003 core technologies. This is covered in Course 2273, Managing and Maintaining a Microsoft Windows Server 2003 Environment, Windows 2003 networking technologies and implementation.

This is covered in Course 2277, Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure : Network Services, Windows 2003 directory services technologies and implementation. This is covered in Course 2279, Planning, Implementing, and Maintaining a Microsoft Windows Server 2003 Active Directory Infrastructure)

PARTICIPANTS

This course is intended for systems engineers with one to three years of experience supporting multiple desktop and server computers running Microsoft Windows® in medium to large enterprise organizations, and who have a need to plan an SMS deployment .

CONTENU DU COURS

- Module 1** : Preparing for Systems Management Server 2003
- Module 2** : Planning the Systems Management Server 2003 Hierarchy
- Module 3** : Planning for Systems Management Server 2003 Deployment, Part 1
- Module 4** : Planning for Systems Management Server 2003 Deployment, Part 2
- Module 5** : Deploying Systems Management Server 2003, Part 1
- Module 6** : Planning and Deploying Systems Management Server 2003
