

VIRUS PROTECTION AND INTEGRATED CLIENT SECURITY SOLUTIONS

Réf. : SYM30

Symantec AntiVirus Corporate Edition 10.0 Technical Training

Support de cours :  Symantec. Certification : Nous consulter

This course prepares system administrators to install and manage a Symantec AntiVirus network, including the integrated Spyware and Adware protection. Using interactive labs, participants learn to install Symantec AntiVirus clients and servers using multiple techniques, including how to set up advanced installation types to meet complex user criteria. The class installs, configures, and tests an entire Central Quarantine environment. Participants learn about and configure different types of virus scans from the central console. They install and configure an internal LiveUpdate server system. They learn about and experiment with the Symantec AntiVirus logs. Participants learn how virus definitions are downloaded and pushed to servers and clients within the Symantec AntiVirus network, which is crucial to network loading and scaling decisions. They learn how configuration options are stored in the network, and how they are pushed to servers and client, advanced discovery techniques and when to use them, how the AutoProtect real time scanning is implemented, and about improvements to scaling features to enhance simultaneous rollouts and updates.

PRE-REQUIS

Beginner-to-intermediate level. This class assumes an understanding of advanced computer terminology, including NetWare and TCP/IP networking terms and Internet terms, and an administrator-level knowledge of Novell NetWare and Microsoft Windows NT-based operating systems.

PARTICIPANTS

This course is designed for antivirus network managers, resellers, systems administrators, client security administrators, or systems professionals and consultants charged with the installation, configuration and day-to-day management of Symantec AntiVirus Corporate Edition for Client & Server in a variety of network environments, and are responsible for troubleshooting and for tuning the performance of Symantec AntiVirus Corporate Edition for Client & Server in the enterprise environment.

CONTENU DU COURS

- Module 1** : Introducing Symantec Client Security
- Module 2** : Planning the installation
- Module 3** : Installing Symantec AntiVirus management components
- Module 4** : Installing AntiVirus servers
- Module 5** : Installing AntiVirus clients
- Module 6** : Client roaming
- Module 7** : Migrating to the current version
- Module 8** : Managing Symantec AntiVirus
- Module 9** : Updating virus definitions
- Module 10** : Identifying threats, introduction to scanning
- Module 11** : Scheduling and configuring antivirus scans
- Module 12** : Configuring and using Live Update
- Module 13** : Managing Central Quarantine
- Module 14** : Secure communications
- Module 15** : Unsupported Tools

Symantec Mail Security for SMTP 4.0 Technical Training

Support de cours :  Symantec. Certification : Nous consulter

This unit contains an introduction to Symantec Mail Security for SMTP 4.0 Symantec Mail Security for SMTP 4.0 is designed to scan incoming message traffic for viruses and destructive programs. Additionally, Symantec Mail Security for SMTP 4.0 allows administrators to filter email and effectively block unsolicited message traffic. This unit highlights the new features of Symantec Mail Security for SMTP 4.0. It also steps over some of the current threats to security in a mail server environment and how Symantec Mail Security for SMTP 4.0 is structured to combat them. After you complete this unit, you will be able to do the following :
 Discuss the new features in Symantec Mail Security for SMTP 4.0 ;
 Discuss common mail security threats ;
 Discuss how Symantec Mail Security combats these threats.

PRE-REQUIS

No.

CONTENU DU COURS

- Unit 1** : Intro to Symantec Mail Security for SMTP 4.0
- Unit 2** : Overview of Symantec Mail Security for SMTP 4.0
- Unit 3** : Installing Symantec Mail Security for SMTP 4.0
- Unit 4** : Configuration Settings
- Unit 5** : Policy Configuration
- Unit 6** : Troubleshooting Symantec Mail Security
